CZECH **LED LUMINAIRES**

STAINLESS-STEEL RELIABILITY FOR EXTREMES

SPONA 3G INOX 316

BENEFITS

- ✓ **Extremely high resistance in harsh environments**
- ✓ **Reliable light fixture mounting in mechanically demanding conditions**
- ✓ **Consistent appearance with no sign of corrosion**
- ✓ **Wide luminaire compatibility**

HOW DOES IT WORK?

INOX 316 ensures that the appearance of the Lighting unit stays consistent throughout its lifetime while maintaining all its mechanical qualities. The another advantage is its mechanical firmness. All those material´s features make it clear choice for customers installing luminaires in the chemically aggressive enviroments and elsewhere.

INOX 316 ensures that the appearance of the light stays consistent throughout its lifetime while maintaining all its mechanical properties.

APPLICATION

- Coastal areas
- Ports, docks, cargo ships
 - environments constantly exposed to salt water
- Swimming pools and aqua parks
- Chemical and food processing plants
- Medical facilities with high chloride levels
- Car washes
- Industrial sites subject to high mechanical stress and vibrations
