CZECH **LED LUMINAIRES**

SIRIS

THE PERFECT BALANCE OF DESIGN AND FUNCTIONALITY

BENEFITS

- ✓ More performance in one light
- ✓ Several colours spectra
- ✓ Eye comfort
- ✓ Visually attractive design

HOW DOES IT WORK?

SIRIS LED panels are modern interior luminaires that replace conventional lighting. What makes these panels so special is their **low profile, stylish design and even light distribution**.

LED panels are the ideal choice as **ceiling luminaires**, as they can be installed in plasterboard or grid ceilings or on a frame as ceiling-mounted luminaires. Their low UGR makes **SIRIS** LED panels ideal for lighting applications that require **high visual performance**.
